

## **SECTION 45 \***

(\* renamed by Z-1-051390)

### **AGRICULTURAL (AG) ZONE**

#### **45.1 GENERAL PURPOSE OF THE AG ZONE**

The Agricultural Zone is intended to be applied to agricultural and farmland areas. The creation of properties less than 40 ha (98.8 ac) in size is not permitted. The AG1 Zone variation permits a wide range of non-intensive agricultural uses whereas the AG2 Zone variation permits intensive and non-intensive agricultural uses. The AG3 Zone variation is intended to be compounded with other AG Zone variations where appropriate to permit secondary farm occupations. The AG4 Zone variation recognizes existing single detached dwellings in the rural area which may or may not have agricultural uses associated with them. The intent is that no new AG4 Zone variations will be created. The AG5 Zone variation is intended to be compounded with other AG Zone variations where appropriate to permit secondary farm dwellings. (Z.-1-202871)

The Minimum Distance Separation (MDS) guidelines, provided by the Ontario Ministry of Agriculture, Food and Rural Affairs (OMAFRA), are used to determine an appropriate setback distance between a livestock facility, manure storage or anaerobic digester and sensitive land uses. The objective is to prevent land use conflicts and minimize nuisance complaints from odour. The MDS I formula is to be used for development which expands the potential for sensitive land uses. The MDS II formula is to be used for development of new or expanding odour sources including, livestock facilities, manure storage and anaerobic digestors. The setbacks are to be calculated in accordance with the guidelines in place at the time an application is made. (paragraph replaced by Z.-1-172557)

Special regulations are also included for kennels and mushroom farms because they are not subject to MDS regulations but create impacts similar to livestock facilities.

#### **45.2 PERMITTED USES**
