

*The City of London*  
*Arva Pumping Station to Huron Street Transmission Main*  
*Municipal Class Environmental Assessment Master Plan*

**NOTICE OF PUBLIC INFORMATION CENTRE**

---

**Background**

The City of London (City) has initiated a Municipal Class Environmental Assessment (MCEA) master plan study to develop short and long-term maintenance and improvement/expansion plans for the Arva Huron Transmission Watermain between the Arva Pumping Station and Huron Street (See Map on Back). This study includes an assessment of the potential need to maintain and/or widen the existing transmission main easement to continue ongoing monitoring of the condition of the watermain and/or for potential maintenance, repair or replacement of the existing watermain. Long term considerations include evaluating alternative options for routing the watermain between the Arva Pumping Station and Huron Street in total or for specific sections for improvement or expansion purposes. The routing options to be investigated will address long-term transmission capacity needs and provide for water system redundancy.

The MCEA study is being completed in accordance with the Ontario Environmental Assessment Act and is following Approach #2 of the Municipal Engineers Association Municipal Class EA (as amended in 2015) process, fulfilling the requirements for Schedule B projects, including public and stakeholder consultation.

**How to Get Involved**

The City of London wants anyone with an interest in the study to have an opportunity to provide input, which will help the project team in the decision-making process.

In order to comply with social distancing requirements for COVID-19 the City will be holding a Virtual Online Public Information Centre (PIC) Scheduled for:

**Date:** Wednesday November 25<sup>th</sup>, 2020

**Time:** 6:00 PM to 8:00 PM

**Format:** Zoom Webinar Presentation followed by a question period

The PIC will present an overview of the project including existing conditions, the need for improvements, potential alternative solutions, preferred short and long term strategies including any potential water infrastructure projects and next steps in the study.

To register for this PIC please send an email to: [Paul.adams2@aecom.com](mailto:Paul.adams2@aecom.com).

The presentation and material presented during this online PIC will also be made available in a virtual format on the City of London Project Webpage:
