An Essential Caregiver (EC) is designated by the resident and/or their Power of Attorney or Substitute Decision Maker (POA/SDM) for care. Essential Caregivers, may visit in the resident’s bedroom to provide direct care to the resident (e.g., supporting feeding, mobility, personal hygiene, cognitive stimulation, communication, meaningful connection, relational continuity, and assistance in decision-making). The Essential Caregiver may also take their resident to the Patio on their Home Area or out the front doors for a walk on the Dearness Home grounds. Please note that the resident must be masked, as tolerated.

At Dearness Home:
- Up to 2 Essential Caregivers may be designated for each resident, but only one of them may be in the Home to visit the resident at one time.
- The same person may be designated as an EC for more than one resident, but:
  - The EC may only visit 1 Home area per day, and
  - The EC may not visit another resident for 14 days after visiting a resident who is self-isolating or symptomatic and/or the Home area is in outbreak.
- Essential Caregivers must be over 18 years of age.
- The resident or POA/SDM may change the persons designated to be ECs in response to changing care needs reflected in the plan of care, or where illness or other barriers prevent a previously identified person from attending.
- All Essential Caregivers at Dearness Home will be educated in person prior to gaining access to the Home and will review the training package every three months thereafter.
- All ECs will wear appropriate Personal Protective Equipment in the Home and during their visit.
- EC access to Dearness Home ends when the resident is discharged or passes away.

Covid-19:
Covid-19 can be fatal for those who live in long-term care, experience elsewhere shows as many as 50% of those infected die, so keeping Covid-19 out of Dearness Home is extremely important. Accordingly, Essential Caregivers will be required to respect and practice the infection control measures required to keep our residents and staff safe.

Before Essential Caregivers come into the Home to provide care, they will receive approximately one hour of in-person education on general expectations and infection control practices, including how to safely put personal protective equipment on and off. They will also attest to reviewing the visiting policy every month and the training package every three months.

If you are the POA or SDM for care, please speak with your loved-one in the Home and your family to decide if you want to designate Essential Caregivers. If so, decide who the Essential Caregiver(s) will be and then please contact Cheryl Gilmour, Manager Community Life at cgilmour@london.ca, or by phone 519-661-0400 x8271 to arrange a mutually agreed upon training time. Please check all the latest updates on the www.dearnesshome.ca
Essential Caregiver Information Package and Guidelines
Please review these guidelines and expectations below

General Expectations of Essential Caregivers:

Before coming to Dearness Home, an Essential Caregiver must:

• Read the Dearness Home “Visits During Pandemic” policy each month  
• Attest that you have reviewed the training package every three months.  
• Only access the Home during Covid-19 visiting hours – 9:00 a.m. to 8:00 p.m., Monday through Friday and 9:00 a.m. to 4:30 p.m. on weekends and holidays.  
• Self-screen at home and do not visit Dearness if there are signs or symptoms of Covid-19.  
• Ensure there is only one Essential Caregiver visiting the resident at any given time.

Upon entering Dearness Home, an Essential Caregiver must:

• Place their Essential Caregiver identification sticker on their chest or where it is visible at all times.  
• Sign in and out at the Entrance/Exit.  
• Pass active screening when entering the building at each visit, including answering questions and a temperature check. Please note that temperature must be under 37.8C.  
• Attest that they have:
  • Read the “Visits During Pandemic Policy” every month.  
  • Review the Essential Caregiver educational training package every three months.  
  • Have not visited another resident who is self-isolating or symptomatic, and/or another Home in outbreak in the last 14 days.  
• Attest to, only when Dearness is currently in outbreak and public health require it, that they have:
  • Documented proof of their negative, PCR type test results for Covid-19 within the last 7 days and that they have not subsequently tested positive for Covid-19.  
  • Proceed to the Covid-19 testing area to register with the nurse and get rapid tested if necessary. This testing area is left to the main lobby.

Vaccination:

The Government now allows greater freedoms when both the Essential Caregiver and the residents are fully vaccinated.

To be recognized as fully vaccinated:

• The EC must have received both doses of vaccine.  
• There must be at least 14 days since the second dose was received.  
• The official confirmation of the second vaccination must be shared with Cheryl Gilmour or her delegate.

Please Note:

• Fully vaccinated ECs will visibly wear a green EC sticker when in the Home.  
• All other ECs will wear a red sticker when in the Home.  
• All stickers must be very visible during the visits.
Infection Prevention and Control Measures:

The Essential Caregiver must follow all the guidelines provided in the in-person education, which is also included in the educational hand-out, including:

- Practicing good hand hygiene, prior to entering and upon exiting the home.
- Always wearing the supplied surgical mask and eye protection appropriately while in the Home and when walking outside with the resident. Please note that eye protection is not required where both the resident and the EC are fully vaccinated.
- Using alcohol-based hand rubs as the preferred method of cleansing, unless hands are visibly soiled, when soap & water would be preferred.
- Where the resident is in isolation, wearing the designated droplet/contact personal protective equipment which includes surgical mask, eye protection, gloves, and a gown. Essential Caregivers must follow protocol to properly put on and remove PPE.
- Asking Dearness Home Staff for assistance by using the call bell if unsure how to follow any steps.
- Physically distancing:
  - If either the EC or the resident are not fully vaccinated, the EC will remain two meters distant from the resident during visits, aside brief hugs.
  - If both EC and resident are fully vaccinated, EC may have physical contact with the resident, for example, holding hand or hugs.

Essential Caregiver Expectations while in the Home must:

- Wear the applicable Essential Caregiver identification sticker on your upper body and ensure it is always clearly visible.
- Proceed directly to the resident’s room. If the resident is in the common areas, the Caregiver will take them to their room.
- Essential Caregivers will not stop to talk to others and will not travel to other areas of the Home to visit others.
- Stay within the resident’s room and use the call bell if anything is needed outside of the room unless the Essential Caregiver wishes to take the resident to the Home Area’s balcony/patio, or outside of Dearness Home for a walk in the grounds.
- Resident mealtimes:
  - If either the EC or the resident are not fully vaccinated, the EC will remain in the resident’s room if staying through a mealtime. The resident meals will be served in the resident’s room.
  - If both EC and resident are fully vaccinated, EC may choose to join the resident in the dining room.
- At the end of the visit, directly proceed to exit the building.

Please Note: Failure to follow expectations is a serious matter that may result in a discontinuation of Essential Caregiver access.

For more information Resident’s Absences from Dearness Home, please see “Residents Leaving and Returning to Dearness Home”.
Outbreak Precautions or Failure of Febrile Screening:

- In the event a home enters into a Covid-19 outbreak in the resident’s Home area, continuation of visits will be discussed with the Essential Caregiver to review risks of continued visits.
- In the event a resident is isolated due to failed febrile screening, return from hospital, etc., the Essential Caregiver will be notified that they will be required to wear the appropriate PPE and will discuss whether they wish to continue the visits.
- In the event a home enters into a Covid-19 outbreak, Essential Caregivers will be notified if public health require a negative PCR test result within the last 7 days to enter the Home.
