

# Ask Your Federal Candidates

## HOUSING AFFORDABILITY

Local housing costs are unsustainable, but cities alone can't solve the national problem of housing affordability. The next federal government needs to address the supply and mix of housing, as demand for affordable and community housing in London reaches record levels.

### ASK YOUR CANDIDATE...

If elected, how would you make housing more affordable for all Londoners?

## CLIMATE CHANGE

Severe weather events linked to climate change are getting more frequent and more dangerous. London needs predictable, long-term federal funding to mitigate and adapt to climate change, prepare for extreme weather events, and create economic opportunities tied to climate action.

### ASK YOUR CANDIDATE...

If elected, how would you make sure London is prepared to handle the effects of climate change?

## ECONOMIC RECOVERY

Recovering from the economic effects of the pandemic will require bold strategies and concrete actions. The next federal government needs to focus on rebuilding from the ground up in communities – where new innovations, entrepreneurship and ideas are made.

### ASK YOUR CANDIDATE...

If elected, how would you support a strong and inclusive economic recovery for London?
