Service: Traffic Control and Street Lights

|$0.20| 2.30%$

Cost per day for the average rate payer (2020 to 2023)

Percentage of the 2020 to 2023 City of London Net Property Tax Supported Budget

Who we are:
- The City provides pedestrian/vehicular traffic control, appropriate lighting, signage and pavement markings.

What we do:
- Traffic Control and Street Lights contributes towards the safe and effective mobility needs of drivers and pedestrians.

Why we do it:
- **Mandatory** - Section 44(1) of the Municipal Act establishes the City’s responsibility to keep highways or bridges under its jurisdiction “in a state of repair that is reasonable in the circumstances”. Minimum service levels for street lighting and traffic controls are established by a variety of legislation and regulations, Ontario Regulation 239/02 (establishes inspection and repair/replacement requirements for traffic signs); Ontario Traffic Manuals and the Highway Traffic Act.
The following table provides an overview of the budget for this service:

The following section provides an overview of the key activities the service plans to undertake from 2020 to 2023 to implement the Corporation’s 2019 to 2023 Strategic Plan, as well as an overview of the risks and challenges the service is anticipated to experience during this period:

**Service Highlights 2020 to 2023**
- Development of the Connected and Autonomous Vehicle (CAV) Strategy.
- Implementation of the Transportation Intelligent Mobility Management System (TIMMS).
- Amendments to the Street Light Local Improvement Program.
- Improving safety for all modes of travel with the implementation of the Automated Speed Enforcement (ASE) Program, subject to Council approval.

**Risks and Challenges Anticipated in 2020 to 2023**
- CAV is new and quickly evolving technology. The strategy will need to be flexible as the technology matures.
- Approval of the various contracts required to implement TIMMS.
- Coordination of TIMMS components that are within other projects.
- Managing travel time expectations.
- Community support for the installation of street lights in currently unlit areas is required for this project to be successful.
The service directly supports the following components of the Corporation’s 2019 to 2023 Strategic Plan:

**Building a Sustainable City**
Londoners can move around the City safely and easily in a manner that meets their needs.

**Expected Result:** Increase access to transportation options.

**Strategy:**
- Develop a strategic plan for a future with connected and autonomous vehicles. (BSC-28)
