ACCESSIBLE TRICK OR TREATING HERE!
HOW TO HELP MAKE TRICK OR TREATING MORE ACCESSIBLE

• Clear walkways to your home. Move vehicles and obstacles to allow children and parents using mobility aids like wheelchairs, walkers or scooters access to your driveway.

• If you have stairs to your home, be willing to come out of your house and meet children to hand out candy in an accessible space.

• Do not use strobe lighting (this can cause seizures and dizziness).

• Turn your porch light on to light up the pathway to your home.

• Turn down music or scary noises.

• Remember that not all children can wear costumes because of sensitivities.

• Try having non candy treats like spider rings or stickers on hand as an alternative.

• Remember that not all children can speak to say “trick or treat” so be patient.

• Understand that older children with disabilities also enjoy trick or treating.

• Keep your eye out for neighbourhood obstacles that may make moving from house to house more difficult.

Let’s work to make our communities more welcoming and accessible for all.

After you’ve made your best effort, put this sign in your window or on your door to show you’re committed to Accessible Trick or Treating!
