Planning Policies

Any change to the Zoning By-law must conform to the policies of the Official Plan, London's long-range planning document. The subject lands are in the Green Space Place Type in The London Plan. The Green Space Place Type is comprised of public and private lands; flood plain lands; lands susceptible to erosion and unstable slopes; natural heritage features and areas recognized by City Council as having city-wide, regional, or provincial significance; lands that contribute to important ecological functions; and lands containing other natural physical features which are desirable for green space use or preservation in a natural state. Lands within the Green Space Place Type vary considerably, and the uses that are permitted within these areas will be dependent upon the natural heritage features and areas contained on the subject lands, the hazards that are present, and the presence of natural resources which are to be protected. Other permitted uses may include: district, city-wide, and regional parks, private green space uses such as cemeteries and private golf courses, agriculture, woodlot management, horticulture and urban gardens, conservation, essential public utilities and municipal services, storm water management, and recreational and community facilities.
