Design Specifications & Requirements Manual

October 2003

Updated January 2025

City of London

Design Specifications and Requirements Manual

The design information contained in this manual is intended to provide guidance beyond legislative and standard design practices for use in the City of London (the City). There will be site specific situations where the design will depart from these practices as it is not possible nor is it the intention of the City to anticipate every situation. The City intends to review and revise the Manual from time to time. The City also acknowledges that other references such as the 'Standard Contract Documents for Municipal Construction Projects' are to be used in conjunction with this manual. The 2012 update of this manual incorporates design information from the City's former 'Subdivision & Development Guide Manual' to provide consistent and current design information for development projects.

The City of London maintains its right to accept or refuse any design submissions and requires an acceptable design for any given circumstance.

Index

Chapter 1	Introduction
Chapter 2	Transportation
Chapter 3	Sanitary Sewer Collection System
Chapter 4	Sewage Pumping Stations
Chapter 5	Storm Sewer Collection System
Chapter 6	Stormwater Management Requirements
Chapter 7	Water Distribution System
Chapter 8	Water Pumping Stations
Chapter 9	Grading
Chapter 10	Erosion and Sediment Control
Chapter 11	Parks and Open Space
Chapter 12	Tree Planting and Protection Guidelines
Chapter 13	Material Substitutions for City of London Projects
Chapter 14	Contact Information
Chapter 15	Installation, Inspection of Water and Sewer Works
Chapter 16	Noise Attenuation Measures
Chapter 17	Trenchless Technologies (for New Construction)
Chapter 18	Drafting and Design Requirements
Chapter 19	Development Compliance Procedure
Chapter 20	Area-Specific Streetscape Standards
