

Meadowlily Road Area Municipal Class Environmental Assessment NOTICE OF STUDY COMPLETION

The City of London has completed a Municipal Class Environmental Assessment (EA) Study to identify and evaluate alternative sanitary servicing solutions and select a preferred servicing strategy for the study area. The study considered various options, including the potential construction and location of a new municipal sanitary pumping station, as well as alternative alignments for a multi-use pathway along the Meadowlily Road corridor. The study area is shown below:

Figure 1: Meadowlily Road Area (Study Area)

The project was completed in accordance with Schedule 'B of the Municipal Class Environmental Assessment (October 2000, as amended in 2007, 2011, 2015 and 2023). As such, consultation with the public, technical agencies, and Indigenous communities played a key role in developing the study recommendations.

Public Review

A Project File Report (PFR) documenting the planning process undertaken, details of the study recommendations as well as potential impacts and mitigation measures, has been completed and by this Notice is being placed in the public record for review.

The PFR will be available for review for 30 days, starting April 7, 2026 and ending May 7, 2026 on the City's website (<https://london.ca/projects/meadowlily-road-area-environmental-assessment>), at the London City Hall – City Clerk 3rd Floor (300 Dufferin Avenue) during regular hours of operation Monday to Friday, and at the London Public Library – Pond Mills Branch (1166 Commissioners Rd E, London, ON N5Z 4W8) during regular hours of operation.

The City of London and MTE Consultants acknowledge the project falls within the traditional and Treaty territories of several First Nations in Southwestern Ontario. We also recognize the historic and current use of this area. We welcome any comments you may have.

Contact Information

If there are any outstanding concerns or issues with this project during the 30-day review period, please address them to the City staff listed below and we will attempt to seek a mutually acceptable resolution:

Moe Salama, M.Eng, P.Eng

(519) 859-5425

In addition, a request may be made to the Ministry of the Environment, Conservation and Parks for an order requiring a higher level of study (i.e. requiring an individual/comprehensive EA approval before being able to proceed), or that conditions be imposed (e.g. require further studies), only on the grounds that the requested order may prevent, mitigate or remedy adverse impacts on constitutionally protected Aboriginal and treaty rights. Requests on other grounds will not be considered. Requests should include the requester contact information and full name for the Ministry.

Requests should specify what kind of order is being requested, how an order may prevent, mitigate or remedy those potential adverse impacts, and any information in support of the statements in the request. This will ensure that the ministry is able to efficiently begin reviewing the request. The request should be sent in writing or by email to below contacts, with a copy to the City of London project manager.

**The Honourable
Todd McCarthy**
Minister of the
Environment,
Conservation and Parks
