1. Land and Treaty Acknowledgement

The Project Team acknowledges that the City of London Pollution Prevention Control Plan (PPCP) update study will occur on the traditional lands of the Anishinaabek, Haudenosaunee, Lūnaapéewak and Attawandaron. The City of London (City) aims to build and strengthen its relationships with First Nations communities to further the Calls to Action outlined within the Truth and Reconciliation Commission's final report.

Through the Land Acknowledgement below, the City is committed to honouring the following treaties:

- Two Row Wampum Belt Treaty of the Haudenosaunee Confederacy/Silver Covenant Chain with the Dutch
- Beaver Hunting Grounds of the Haudenosaunee NANFAN Treaty of 1701 and the British Crown
- McKee Treaty of 1790, with the Anishinaabeg and the British Crown
- London Township Treaty of 1796, with the Anishinaabeg and the British Crown
- Huron Tract Treaty of 1827, with the Anishinaabeg and the British Crown
- Dish with One Spoon Covenant Wampum of the Anishinaabek and Haudenosaunee

"This land continues to be home to diverse Indigenous people (First Nations, Métis and Inuit) whom we recognize as contemporary stewards of the land and vital contributors to society. We hold all that is in the natural world in our highest esteem and give honour to the wonderment of all things within Creation. We bring our minds together as one to share good words, thoughts, feelings and sincerely send them out to each other and to all parts of creation. We are grateful for the natural gifts in our world, and we encourage everyone to be faithful to the natural laws of Creation."

2. Introduction

The *First Nations Relationships, Engagement and Consultation Tech Memo* has been prepared in support of the City of London PPCP update study as part of the City's ongoing efforts to build and strengthen their relationships with neighbouring First Nations communities.

The aim of this technical memorandum is to outline all of the engagement points of contact and consultation that the Project Team was involved in over the course of this study. The key objective was to appropriately inform and provide opportunities for feedback throughout the study process, including the background study area assessment, the development and evaluation of alternatives, and the selection of the preliminary preferred strategy. It is integral for the PPCP update study to seek input on the potential impacts of the proposed strategy to First Nations Aboriginal and Treaty Rights, as recognized and affirmed in the *Constitution Act, 1982*.

Ultimately, the proposed City-wide "Point-of-Purchase" weeping tile disconnection program will reduce the volume and frequency of untreated wastewater discharges to the Thames River and receiving streams from various sewer system overflows and pumping station bypasses.

3. Legislation and Policy Context

First Nations have a deep connection to the Thames River. Water is considered a life source, is alive, has spirit and is home to physical and spiritual beings. First Nations also hold the belief that the Thames River is important to the health and wellbeing of all residents that live in and surround the City of London. The PPCP is in alignment with the following water quality and safety frameworks.

3.1 Water Declaration

The Water Declaration of the First Nations in Ontario, October 2008, is an established Indigenous law and policy, asserting Indigenous rights, responsibilities, and sovereignty over their water resources. It emphasizes the sacred relationship between First Nations and water, recognizing water as a living entity essential to all life. The declaration serves as a call to action for governments and the public to respect Indigenous water rights and ensure clean, accessible water for all. The following key principles are generally outlined in the declaration:

1. **Inherent Rights & Governance:** First Nations have the inherent right to govern and protect water within their territories, based on traditional laws and knowledge.
2. **Water as a Sacred Responsibility:** Water is not just a resource but a spiritual and life-giving force that must be protected for future generations.
3. **Opposition to Commercial Exploitation:** Many First Nations oppose large-scale industrial use, pollution, and privatization of water, advocating for sustainable and community-based water management.
4. **Safe Drinking Water for All:** The declaration often calls for action to address the ongoing water crises in many Indigenous communities, ensuring access to clean, safe drinking water.
5. **Collaborative Stewardship:** First Nations seek recognition and partnerships with governments and organizations to co-manage and protect water resources.

In contrast, the Canada Water Act (1970) is a federal legislation that governs the conservation, management, and protection of Canada's water resources. However, it does not explicitly recognize Indigenous water rights or include provisions for water governance and water stewardship traditions. The federal government has been working with Indigenous Nations to address this issue, particularly through programs like the First Nations Water and Wastewater Action Plan (FNWWAP). The FNWWAP aims to improve access to safe drinking water and wastewater systems in First Nations communities across Canada by providing funding for water infrastructure, operations, and training. The Safe Drinking Water for First Nations Class Action Settlement (2021) allocated \$8 billion to address water issues, including infrastructure and compensation.

3.2 United Nations Declaration on the Rights of Indigenous Peoples

The United Nations Declaration on the Rights of Indigenous Peoples (UNDRIP) outlines that Indigenous peoples have the right to be involved in decisions that affect them. This includes being consulted in a way that is free from pressure, prior to when any decisions are made, and includes all the required information to make informed choices - this is known as Free, Prior, and Informed Consent. UNDRIP explains that proponents, including municipalities such as the City of London, must work with Indigenous communities in good faith and make sure they are included in projects that could impact their rights, lands, cultures, or resources. These conversations must be respectful, ongoing, and follow each community's culture and preferences. The goal is to build real partnerships based on trust and cooperation, where agreement is sought before moving forward with things that affect them.

4. First Nations Relationships

To foster a collaborative working relationship with First Nation communities, the Project Team has taken the following steps:

- Respected each First Nation's choice regarding their preferred level of involvement in the PPCP update study.
- Aligned engagement approaches with the specific consultation protocols of each First Nation community, including preferred communication methods and input processes.
- Incorporated First Nations' feedback into strategy development and addressed any concerns raised.
- Provided regular status updates to First Nations, including the issuance of Notices.
- Offered First Nations the opportunity to review and provide feedback on the draft PPCP update study report prior to finalizing recommendations.

Additionally, a First Nations consultation advisor from KJI Consulting Collective was retained to ensure open communication and that engagement approaches are culturally appropriate.

4.1 First Nations Contact List

The Study Area for the PPCP update study aligns with the municipal boundary of the City of London, which is located on the traditional lands of the Anishinaabek, Haudenosaunee, Lūnaapéewak and Attawandaron. The three First Nations that are neighbours to the City of London are the Chippewas of the Thames First Nation, Oneida Nation of the Thames, and Munsee-Delaware Nation. Identifying potentially affected First Nations includes considering not only the direct impacts to land and resources but also broader effects on cultural heritage, traditional practices, and Aboriginal Treaty and Rights.

Based on a preliminary assessment of the Study Area, **Table 4-1** lists the potentially affected First Nation communities identified by the Ministry of the Environment, Conservation and Parks (MECP) as well as by the Project Team. These First Nations are all considered Treaty and/or Aboriginal Rights-Holders that are required to be engaged and consulted as part of the Municipal Class Environmental Assessment (MCEA) process.

Table 4-1: Identified Potentially Affected First Nation Communities

Identification Method	First Nation Community and Rights-Holder
MECP Identified	• Aamjiwnaang First Nation • Bkejwanong First Nation (Walpole Island) • Caldwell First Nation • Chippewas of the Kettle and Stony Point First Nation • Chippewas of the Thames First Nation • Oneida Nation of the Thames
Project Team Additionally Identified	• Munsee-Delaware Nation • Delaware Nation at Moraviantown • Haudenosaunee Development Institute • Oneida Nation Council of Chiefs

Note that the Haudenosaunee Development Institute are legislated by the Haudenosaunee Confederacy Chiefs Council to speak on land-related matters. However, the Haudenosaunee Development Institute were removed from the First Nations Contact List later on in the study. The Oneida Nation Council of Chiefs were identified and added to the First Nations Contact List later on in the study.

The First Nations Contact List, including names, emails, and addresses of key contacts (such as the Chief, Consultation Coordinator and/or the general consultation department), was initially developed based on the Project Team's knowledge of the Study Area and the City's understanding and relationships with neighbouring communities. The contact list was used for notifications and correspondences and was updated throughout the course of the PPCP update study as required. The final First Nations Contact List is provided in **Appendix A**.

5. Engagement and Consultation

The PPCP update study aligns with the MCEA process developed by the Municipal Engineers Association (MEA) (October 2000, as amended in 2007, 2011, 2015, 2023 and 2024) for Master Plans, which is approved under the Ontario Environmental Assessment Act (EAA).

The MCEA process includes specific requirements for consulting with Indigenous communities. These requirements aim to ensure that Indigenous peoples are meaningfully engaged in environmental assessments for municipal projects that may affect their rights, lands, or resources. Below is an overview of the MCEA consultation requirements, further discussed in the following sections:

1. Identify Potentially Affected First Nations Communities
2. Early Engagement
3. Review of Relevant Information
4. Ongoing Consultation; and
5. Reporting and Documentation

5.1 Early Engagement

First Nations have a unique understanding of the natural environment given their relationship with the land, practices, and ways of life. As such, they provide unique and valuable information to identify solutions and measures to mitigate impacts on natural and cultural heritage resources. Early engagement ensures that Indigenous perspectives are considered from the beginning, and that communities are aware of projects that could potentially affect them.

Prior to publication to the public, the Notice of Study Commencement, along with an accompanying Letter of Notification, was sent to all First Nations listed on the contact list. The objective was to introduce the Study and determine how the Project Team could support feedback and participation. The initial notification was sent via Purolator using parcel tracking on August 22, 2023, followed by email communication on August 24, 2023. The records of notifications related to early engagement can be found in **Appendix B**.

Following the Notice of Study Commencement, a few First Nations communities responded to acknowledge their receipt and interest in the PPCP update study.

5.1.1 Meetings

Meetings ensure that the needs, requests and relationship building are accomplished at the individual community level rather than treating all First Nations as a single group.

At the Study Commencement, the Chippewas of the Thames First Nation requested an initial meeting to discuss their involvement in the Study. Their community is located south-west of the City and is traversed by the Thames River. The Project Team respected requests for face-to-face meetings, and an in-person meeting was held on October 26, 2023 to introduce the project, discuss potential impacts, and confirm that further engagement and consultation is required.

Through early engagement, the community expressed priority is preserving the safety and quality of Deshkan Zibi for drinking, hygiene, and ceremonial & spiritual purposes. They also note that the drinking water comes from groundwater in close proximity to the Thames River, via a GUDI (groundwater under the direct influence of surface water); one of the surface water intakes is located 50m from the river.

5.1.2 Agreements

As the proponent in this PPCP Update Study, the City of London aimed to provide adequate monetary resources for participation in the study, enabling active engagement.

At the Study Commencement, a Technical Review Agreement with Caldwell First Nation was created and signed prior to initiating materials review and input.

5.2 Ongoing Consultation

Proper consultation includes ongoing and two-way conversations, allowing for both the City and the First Nations communities to share information, concerns, and recommendations.

The Project Team therefore aimed to provide relevant study background information to First Nations, as part of a Project Information Sheet, to allow the communities to engage in meaningful discussions regarding the study's potential impacts. The Project Information Sheet was included as part of all project status updates, and can be found in **Appendix C**.

Two Project Status Updates were provided via email, registered mail, and/or portal submission. The first was sent on March 15, 2024, to inform communities that the Project Team has been working towards completing a background review and system inventory of the Study Area and is currently finalizing the hydraulic model. The second was sent on March 13, 2025, to inform communities that an evaluation of the alternative strategies has been completed, and a preliminary preferred strategy and approach has been selected to reduce the frequency and volume of overflows to the Thames River. Both updates offered another opportunity to meet and discuss incorporating any concerns or comments on the potential impacts. The Project Status Updates can be found in **Appendix C**.

Following the project status update letter, the Notice of Public Information Centre (PIC), along with an accompanying Letter of Notification, was sent via email, registered mail, and portal submission on April 17, 2025 outlining the details for the in-person event. The records of PIC notifications can be found in **Appendix D**. The materials shown at PIC were also uploaded in accessible format to the Project Website, on london.ca/PPCP, which was available for review at any point during and after the study.

5.2.1 Meetings

An additional in-person meeting was held with the Chippewas of the Thames First Nation on June 17, 2025 to provide a project status update regarding the alternatives development and evaluation, as well as the selection of the preliminary preferred strategy - which is to initiate disconnection of weeping tiles at the point-of-purchase.

Following the second project status update, an in-person meeting was requested with the Oneida Nation of the Thames. Their community is located south-west of the City and is traversed by the Thames River. The meeting was held on July 3, 2025 to introduce the project and the preliminary preferred strategy, similar to what was presented for the meeting with the Chippewas of the Thames First Nation.

No concerns related to the preliminary preferred strategy were identified from either of the communities, and the representatives were generally in support.

5.3 Reporting and Documentation

A summary of the engagement with Indigenous Communities, including the method of engagement and date issued can be found in **Table 5-1**.

Table 5-1: Summary of Engagement

Engagement Item	First Nations	Method	Date Issued
Notice of Study Commencement and Letter of Notification	- Aamjiwnaang First Nation - Bkejwanong First Nation (Walpole Island) - Caldwell First Nation* - Chippewas of the Kettle and Stony Point First Nation - Chippewas of the Thames First Nation* - Oneida Nation of the Thames - Munsee-Delaware Nation - Delaware Nation at Moraviantown - Haudenosaunee Development Institute	Registered Mail	8/22/2023

A Request for Review Letter will be sent via email, registered mail, and portal submission in Spring 2026 to request review of the draft study report and seek any input on the potential impacts of the recommended strategy to First Nations Aboriginal and Treaty Rights. The letter will also provide notification that the City of London has completed the PPCP update study, with a 30-day public review period. The Notice of Study Completion will contain a link to view the project materials, including the draft study report in accessible format, on the Project Website.

Any concerns raised by First Nations communities have been considered and addressed by the Project Team. The comments and associated responses have been summarized in **Table 5-2**. The Project Team will address additional comments once the draft study report has been reviewed, and this *First Nations Relationships Tech Memo* will be updated as necessary.

Table 5-2: Summary of Comments and Responses

#	Stage of PPCP	First Nation Community	Date and Method	Received Comment	Response/ Action	Date and Method
1	Study Commencement	Caldwell First Nation (CFN)	09/06/2023 Email	Attached Fee Schedule and Technical Review Agreement template, which covers CFN technical participation in the PPCP. Notes that proper agreement is required to begin materials review and input.	Modifications to the Technical Review Agreement were made and reviewed by the risk assessment team. The Technical Review Agreement was signed by GM BluePlan as the proponent and approved by the City. Regarding payment, GM BluePlan will pay CFN within 10 days of the City paying GM BluePlan.	01/29/2024 Email
2	Study Commencement	Chippewas of the Thames First Nation (COTTFN)	09/13/2023 Email	Attached Consultation Protocols and letter from COTTFN noting the potential impacts from the PPCP and their concerns. Requests a meeting with the project team to review the Consultation Protocols.	Potential dates/times were discussed. In-person meeting confirmed for October 26, 2023.	09/19/2023 Email
3	Study Commencement	Caldwell First Nation	09/20/2023 Email	Requests that the Project Team update its contacting process to reflect CFN preference for digital intake instead of physically mailed copies. As well, any requests for engagement should be directed to the Environment & Consultation Department, including uploading the files to the CFN portal.	The First Nations Study Contact List was updated.	09/20/2023 Email
4	Study Commencement	Caldwell First Nation	01/30/2024 Email	Notes that the edited Technical Review Agreement was forwarded for signing with the Chief Administrative Officer.	-	-
5	Study in Progress	Caldwell First Nation	3/17/2025 Nations Connect	In response to the Project Status Update Letter, notes that the consultation unit will look out for the public information session date, but requests the Project Team also send a message via the portal once a date is announced.	-	-

#	Stage of PPCP	First Nation Community	Date and Method	Received Comment	Response/ Action	Date and Method
6	Study in Progress	Chippewas of the Kettle and Stony Point First Nation	4/10/2025 Nations Connect	Attached response letter to the Project Status Update Letter and Project Information Sheet. Requests to receive updates as the project progresses, as well as an opportunity to review the final PPCP report.	-	-
7	PIC	Chippewas of the Thames First Nation	4/22/2025 Nations Connect	In response to the PIC Notification Letter, notes that the consultation unit will not be able to attend the event. Requests for a separate in-person meeting.	Potential dates/times were discussed. In-person meeting confirmed for June 17, 2025.	6/2/2025 Nations Connect
8	PIC	Oneida Nation of the Thames	6/18/2025 Email	Potential dates/times were discussed in June and July for an in-person meeting to introduce the study and provide an update on the PPCP.	In-person meeting confirmed for July 3, 2025.	6/25/2025 Email

Study Commencement Notifications and Letters

NOTICE OF STUDY COMMENCEMENT

THE CITY OF LONDON

POLLUTION PREVENTION CONTROL PLAN (PPCP) UPDATE STUDY

WHAT IS THIS STUDY ABOUT?

The City of London, together with GM BluePlan Engineering, is starting a project that will help us to develop an updated Pollution Prevention Control Plan (PPCP).

The project will:

- Identify an effective management strategy to limit the volume and frequency of untreated wastewater discharges into the Thames River and receiving streams,
- Review the 2018 PPCP Implementation Plan to identify areas of improvement and address future needs,
- Incorporate a cost-benefit analysis to support prioritization of pollution source reduction options,
- Evaluate projects and programs to maximize benefits, feasibility, and participation of the public, and
- Engage the public and First Nations communities in the development of the updated action plan.

The PPCP will ultimately develop a prioritized 5-year action plan that outlines remediation activities and strategies to proactively manage the wastewater system in the City of London, while demonstrating that the wastewater system meets the requirements set out by the Ministry of the Environment, Conservation, and Parks (MECP)'s F-5-5 procedure.

For more information about the PPCP project, please visit london.ca/PPCP or scan the QR code with your smartphone.

HOW IS THIS STUDY PERFORMED?

This study will be performed as a Master Planning Study, satisfying Phases 1 and 2 of the Municipal Engineers Association Class Environmental Assessment process (October 2000, as amended in 2007, 2011, 2015, and 2023), which is an approved process under the Ontario Environmental Assessment Act.

GET INVOLVED!

The City of London encourages residents and other interested parties to actively participate in the review and update of the PPCP. Opportunities to be involved in the study will be advertised on the City's website, including one Public Information Centre (PIC) for you to provide comments and feedback. Upon study completion, a final PPCP report will be available for public review.

Anyone who wishes to be involved in this study should indicate their interest, to the following:

Yanzhen Ou, M.Eng, P.Eng.
Environmental Services Engineer,
Sewer Engineering

THE CITY OF LONDON

POLLUTION PREVENTION CONTROL PLAN (PPCP) UPDATE STUDY

August 24, 2023

978 Tashmoo Avenue
Sarnia, ON
N7T 7H5
Canada

Aanii Chief Plain,

The City of London is undertaking a study to update the Pollution Prevention Control Plan (PPCP) to proactively manage the City's wastewater system and its impact on the environment. The objective of the PPCP is to develop and implement a long-term solution to limit the volume and frequency of untreated wastewater discharges into the Thames River and receiving streams from sewer system overflows and pumping station bypasses.

The City of London regards Aamjiwnaang First Nation as a valued partner in this project with cultural and community interests in the quality and safety of the water of the Thames River. We welcome your involvement in this study to help us understand and identify any issues or concerns the community may have with the current and future wastewater systems. We would like the opportunity to schedule a meeting to discuss how we can support your participation (if you wish to be involved) and share more details about the project plan.

Please find attached the formal Notice of Commencement for the PPCP Update Study. Thank you for your time and consideration.

The objective of the PPCP is to develop and implement a long-term solution to limit the volume and frequency of untreated wastewater discharges into the Thames River and receiving streams from sewer system overflows and pumping station bypasses.

The City of London regards Bkejwanong Territory of Walpole Island as a valued partner in this project with cultural and community interests in the quality and safety of the water of the Thames River. We welcome your involvement in this study to help us understand and identify any issues or concerns the community may have with the current and future wastewater systems. We would like the opportunity to schedule a meeting to discuss how we can support your participation (if you wish to be involved) and share more details about the project plan.

Please find attached the formal Notice of Commencement for the PPCP Update Study. Thank you for your time and consideration.

Hello Dean,

I hope you have been doing well. I wanted to follow up with you on a Notice of Study Commencement that was sent on August 24, 2023 regarding the City of London Pollution Prevention Control Plan (PPCP) Update Study. We welcome your involvement in this study and would like an opportunity to schedule a meeting to discuss how we can support your participation, should you wish to be involved.

Attached is the original Notice of Study Commencement as well as a Project Information Sheet. Please circulate this email and attachments to anyone else within the Walpole Island's Heritage Centre who may be interested.

Should you have any questions, please don't hesitate to contact the City's Project Manager, Yanzhen Ou (oyanzhen@london.ca).

Sincerely,

Ashley An, B.A.Sc.

Subject: City of London - Notice of Study Commencement - Pollution Prevention Control Plan (PPCP) Update Study

Good afternoon Chief Miskokomon,

The City of London is undertaking a Class Environmental Assessment (EA) for the Pollution

Prevention Control Plan (PPCP) Update Study.

The City of London regards Bkejwanong Territory of Walpole Island as a valued partner in this project with cultural and community interests in the quality and safety of the water of the Thames River. We welcome your involvement in this study and would like an opportunity to schedule a meeting to discuss how we can support your participation, should you wish to be involved.

Attached is the Notice of Study Commencement as well as a Letter of Notification. Please circulate this email and the Notices to anyone within your organization who may be interested.

Additional information can also be found on the City's Project Website:

<https://london.ca/projects/pollution-prevention-control-plan-update-study>. Should you have any questions regarding the Study, please contact the City's Project Manager, Yanzhen Ou (oyanzhen@london.ca) and include the secondary contact James Jorgensen (James.Jorgensen@gmblueplan.ca) in all emails.

Sincerely,

Ashley An, B.A.Sc.

THE CITY OF LONDON

POLLUTION PREVENTION CONTROL PLAN (PPCP) UPDATE STUDY

August 24, 2023

14 Orange Street
Leamington, ON
N8H 1P5
Canada

Aanii Chief Duckworth,

The City of London is undertaking a study to update the Pollution Prevention Control Plan (PPCP) to proactively manage the City's wastewater system and its impact on the environment. The objective of the PPCP is to develop and implement a long-term solution to limit the volume and frequency of untreated wastewater discharges into the Thames River and receiving streams from sewer system overflows and pumping station bypasses.

The City of London regards Caldwell First Nation as a valued partner with cultural and community interests in the quality and safety of the water of the Thames River. We welcome your involvement in this study to help us understand and identify any issues or concerns the community has with the current and future wastewater systems, and this input will be integrated within the PPCP. As part of the study process, we would also like to seek out your recommendations and prioritization of pollution source reduction programs based on the impacts on the community's wellbeing.

We look forward to working with the Caldwell First Nation as a community partner by providing more information about the project and to engage you to include your feedback and participation as part of this project.

Please find attached the formal Notice of Commencement for the PPCP Update Study.

Miigwech,

Yanzhen Ou, M.Eng, P.Eng.

Project Overview

Project:	THE CITY OF LONDON POLLUTION PREVENTION CONTROL PLAN (PPCP) UPDATE STUDY
Created:	Aug 16, 2023
Timeline:	Spring 2023 - Spring 2024
Status:	Awaiting response from CFN
Description:	The City of London, together with GM BluePlan Engineering, is starting a project to develop an updated Pollution Prevention Control Plan (PPCP). The project will: - Identify an effective management strategy to limit the volume and frequency of untreated wastewater discharges into the Thames River and receiving streams, - Review the 2018 PPCP Implementation Plan to identify areas of improvement and address future needs, - Incorporate a cost-benefit analysis to support prioritization of pollution source reduction options, - Evaluate projects and programs to maximize benefits, feasibility, and participation of the public, - Engage the public and First Nations communities in the development of the updated action plan. The PPCP will ultimately develop a prioritized 5-year action plan that outlines remediation activities and strategies to proactively manage the wastewater system in the City of London, while demonstrating that the wastewater system meets the requirements set out by the Ministry of the Environment, Conservation, and Parks (MECP)'s F-5-5 procedure.
Assessment Level:	Level 4

Project Report

Project Location

Does your project or any associated activities physically overlap with any of the following areas, including land, water and flora and fauna therein? Please see the map for reference and select all that apply.

None

Does your project or any associated activities likely to result in impacts on the highlighted area on the map, including land, water and flora and fauna therein? Please see the map for reference.

No

Is it possible the project could still have impacts on the air, water or land within a 100 km radius of The Municipality of Leamington, The Town of Essex, The Township of Kingsville, and The Township of Pelee (Point Pelee & Pelee/Island), as set out on the map? Please see the map for reference.

Yes

Project Impact Assessment

Do you anticipate or are you already aware that this project will require approvals by any of the following regulatory authorities or ministries? Please select all that apply.

Ontario Ministry of the Environment, Conservation and Parks

If you anticipate that the project requires a federal impact assessment and/or a provincial environmental assessment, or you are already aware that such an assessment is required, please indicate the classification for each assessment (e.g. Municipal Class EA, Schedule C, TPAP, etc.)

Provincial

The study will be performed as a Master Planning Study, satisfying Phases 1 and 2 of the Municipal Engineers Association Class Environmental Assessment process (October 2000, as amended in 2007, 2011, 2015, and 2023), which is an approved process under the Ontario Environmental Assessment Act.

Impact assessment documents - description of uploads:

- Notice of Study Commencement for the City of London Pollution Prevention Control Plan (PPCP) Update Study. City of London. August 24, 2023.
- Project Notification Letter to Caldwell First Nation for the City of London Pollution Prevention Control Plan (PPCP) Update Study. City of London. August 24, 2023.

Impact assessment documents - files

Economic Impacts

Could this project directly benefit CFN members economically through any of the following? Please select all that apply:

None of the above

Could this project directly impact the CFN members economically through any of the following? Please select all that apply:

None of the above

Does this project physically overlap with the area highlighted in this map (located within the municipality of Leamington)?

No

Archaeological & Sacred Sites

Please select all of the statements regarding archaeological and sacred sites that apply to this project.

None of the above

According to the Ministry of Heritage, Sport, Tourism and Culture Industries' Standards and Guidelines for Consultant Archaeologists, does this project require any of the following. Please select all that apply. If unsure about any, please select 'Unsure' as well.

None of the above

Species at Risk

Have you entered into, or are you in negotiations toward a landscape agreement under Ontario's Endangered Species Act, 2007?

No

Have you applied for a permit under section 17 of Ontario's Endangered Species Act, 2007, or have you applied for a permit or an agreement under section 73 of the Species at Risk Act?

No

Does the project construction, operation and / or implementation overlap with the habitat or flight paths of the following species listed in Ontario's Endangered Species Act, the Species at Risk Act, or in the Schedule of the Migratory Birds Convention Act?

No

Waterways

Do any of the following apply to the project? Please refer to the map. If you are unsure about any of these, please select unsure as well.

The project physically overlaps with or concerns a waterway located within the area circled

Do any of the following apply to the project? If you are unsure about any of these, please select unsure as well.

None of the above apply to this project

Culture & Language

Could this project directly benefit CFN members culturally through any of the following? Please select all that apply. If you are unsure about any of these, please select unsure as well.

Opportunity for the CFN to educate and promote awareness of the Anishinaabe culture and traditions among non-members

Human Health

Does this project involve the use, production, or release of any pollutant, effluent or substance that has been known or presumed to have harmful effects on human health?

Yes

Please list which substances, pollutants or effluents this project will use, produce and release.

This Pollution Prevention Control Plan Update Study aims to identify an effective management strategy to limit the volume and frequency of untreated wastewater discharges into the Thames River and receiving streams.

Are there any scientific reports you have had to submit or will have to submit to the Crown concerning the use of toxins or contaminants?

No

Other

Does the project involve an influx of people during the construction phase (more than 100) within any of the regions below? Please select all that apply.

None of the above

Are there any additional documents you would like to include for this submission?

No

Is there anything else you would like to share about the project?

The City of London regards Caldwell First Nation as a valued partner in this project with cultural and community interests in the quality and safety of the water of the Thames River. We welcome your involvement in this study to help us understand and identify any issues or concerns the community may have with the current and future wastewater systems.

Would you like a follow-up meeting?

I would like to setup a meeting with your Consultation Coordinators

Good morning Ashley,

The Environment and Consultation Department at CFN is your first point of contact when requesting engagement with Caldwell. Your first step should be to upload your request for engagement to our portal at consultwithcaldwell.ca if you haven't already. I appreciate your invitation to partner in your project; we have many band members who live in and around London. We recognize the need for robust pollution mitigation in CFN Traditional Territory.

I've attached our Technical Review Agreement template, which we use for environment and archaeology projects. It covers our technical participation in most tasks related to your project. Please feel free to fill it out and modify sections that don't apply to your project, then send it back for approval; we can then sign off and begin materials review and input. I've also attached our fee schedule so you can get an idea, for budgeting purposes, regarding our costs if the need for involvement escalates beyond technical staff (i.e. community engagement, leadership consultation, etc.).

Best,

Zack Hamm

Environment and Consultation Department Manager

Subject: [EXTERNAL] Re: Duty to Consult - Wastewater London

Good afternoon Yanzhen,

We received a hard copy of your notice of study commencement for your POLLUTION PREVENTION CONTROL PLAN UPDATE STUDY.

Please update your process to reflect our digital intake and point of contact preferences. Requests for engagement on these projects should be directed to our Environment & Consultation Department, including uploading your request and files to our portal at consultwithcaldwell.ca; there, you will also find out Protocols for Consultation for a better understanding of our process at Caldwell First Nation.

By email after you've used our portal, you should direct your requests, files and updates to our department inbox at ecd@caldwellfirstnation.ca, our Consultation Coordinator, Michelle (ecc@caldwellfirstnation.ca) and myself.

We will be interested in conducting a technical review of your materials and project as they emerge. For this, we have a technical review agreement (TRA) template. I've attached it here for you to fill out and return, signed, to me at this address. Feel free to forward any questions you may have.

Best,

Zack Hamm

Zack,

See attached technical agreement signed by myself on behalf of GM BluePlan. I've included the 'word tracked changes version' so you can review our changes. The important one to note came from our internal risk team regarding payment. GM BluePlan will pay Caldwell within 10 days of the City of London paying GM BluePlan. In summary the process would be:

Caldwell First Nation invoice GM BluePlan. GM BluePlan will invoice the City of London for the same amount. City of London pay GM BluePlan, GM BluePlan pay Caldwell First Nation. I anticipate this process to occur within the 30 days stated in the original agreement but as aspects are outside of our control we cannot commit to it in the agreement.

Regards
James

Subject: Re: City of London - Notice of Study Commencement - Pollution Prevention Control Plan (PPCP) Update Study

Good morning Ashley,

The Environment and Consultation Department at CFN is your first point of contact when requesting engagement with Caldwell. Your first step should be to upload your request for engagement to our portal at consultwithcaldwell.ca if you haven't already. I appreciate your invitation to partner in your project; we have many band members who live in and around London. We recognize the need for robust pollution mitigation in CFN Traditional Territory.

I've attached our Technical Review Agreement template, which we use for environment and archaeology projects. It covers our technical participation in most tasks related to your project. Please feel free to fill it out and modify sections that don't apply to your project, then send it back for approval; we can then sign off and begin materials review and input. I've also attached our fee schedule so you can get an idea, for budgeting purposes, regarding our costs if the need for involvement escalates beyond technical staff (i.e. community engagement, leadership consultation, etc.).

Best,

Zack Hamm

Aanii Chief French,

The City of London is undertaking a study to update the Pollution Prevention Control Plan (PPCP) to proactively manage the City's wastewater system and its impact on the environment. The objective of the PPCP is to develop and implement a long-term solution to limit the volume and frequency of untreated wastewater discharges into the Thames River and receiving streams from sewer system overflows and pumping station bypasses.

The City of London regards Chippewas of the Thames First Nation as a valued partner with cultural and community interests in the quality and safety of the water of the Thames River. We welcome your involvement in this study to help us understand and identify any issues or concerns the community has with the current and future wastewater systems, and this input will be integrated within the PPCP. As part of the study process, we would also like to seek out your recommendations and prioritization of pollution source reduction programs based on the impacts on the community's wellbeing.

We look forward to working with the Chippewas of the Thames First Nation as a community partner by providing more information about the project and to engage you to include your feedback and participation as part of this project.

Please find attached the formal Notice of Commencement for the PPCP Update Study.

722063: City of London Pollution Prevention Control Plan Update

Project description

The City of London, together with GM BluePlan Engineering, is starting a project that will develop an updated Pollution Prevention Control Plan (PPCP).

The project will:

- Identify an effective management strategy to limit the volume and frequency of untreated wastewater discharges into the Thames River and receiving streams,
- Review the 2018 PPCP Implementation Plan to identify areas of improvement and address future needs,
- Incorporate a cost-benefit analysis to support prioritization of pollution source reduction options,
- Evaluate projects and programs to maximize benefits, feasibility, and participation of the public, and
- Engage the public and First Nations communities in the development of the updated action plan.

The PPCP will ultimately develop a prioritized 5-year action plan that outlines remediation activities and strategies to proactively manage the wastewater system in the City of London, while demonstrating that the wastewater system meets the requirements set out by the Ministry of the Environment, Conservation, and Parks (MECP)'s F-5-5 procedure.

London, ON N5X 4E7

Dear: Ashley An and James Jorgensen

I hope this finds you well and in good spirits. I think it is important to note that recently COTTFN held an election and any future correspondence to the Nation should be addressed to Chief Joe Miskokomon.

This letter is to confirm that Chippewas of the Thames First Nation (COTTFN) has reviewed the proposed project submitted by GM BluePlan, on August 23, 2023. Throughout our review we have found the following impacts to our Traditional and Treaty Territory and deem it to be of extensive concern:

The proposed project is located within the London Township Treaty-1796, McKee Treaty- 1790, Huron Tract Treaty- 1827 (#29), COTTFN Traditional Territory, and the Big Bear Creek Land Selection Area.

Further to the concerns above, there are also a number of intersecting species at risk that are impacted by the release of wastewater into the Thames River. Additionally, this project requires consideration of COTTFN creeks/waterbodies, the predicted flood impact models, historic water levels, and the 100-year event prediction model of flooding.

Another perspective that must be considered are the impacts to COTTFN rights to harvest. The connection and relationship to the Thames River is integral to COTTFN culture and life ways. COTTFN is encouraged by the proposed project and requests to be involved in the development of the study. As suggested in your letter, we would like to have an introductory meeting to discuss that participation. Please reach out to me to schedule a meeting for October.

We look forward to continuing this open line of communication. To implement meaningful consultation, COTTFN has developed its own protocols - a document and a process that will guide positive working relationships. We would be happy to meet with you to review COTTFN's Consultation Protocols. As per 'Appendix C' of the Wiindmaagewin, we will be sending an invoice based on our time to review the documentation. The invoice will come from COTTFN's Finance Department. Please do not hesitate to contact me if you need further clarification of this letter.

Sincerely,

Original Signed

2. Study Aim and Objectives
3. Principles of Relationship Building
4. Next Steps and Closing

- James presented project information summary. The following discussion points were addressed:
 - Noted that in the City of London 50,000 homes are estimated to have their foundation drains (weeping tiles) connected to sanitary sewers.
 - A foundation drain is a drain around the perimeter of the basement footing, below ground, that collects infiltrated rainwater. For homes built before 1986, it was common to directly connect this drain to the sanitary sewer.
 - Supported presentation with detailed explanation on the purpose of the PPCP, the MECP F-5-5 procedure and overflow volume compliance.
- Education is an important aspect of this project, "out of sight, out of mind"
 - Knowledge of basement flooding issues due to sewer surcharge is not intuitive to homeowners. If the homeowners do not physically experience basement flooding, there is low incentive to be proactive and remove the connection.
 - The connection is on the privately owned portion of the property so the City cannot enforce disconnection.
 - Homeowners do not want sump pumps installed as it is seen as a burden
 - However sump pumps are not new, all post 1980s homes have sump pumps
- City of London has funding available to eligible homeowners to disconnect their foundation drains:
 - 90% funded Basement Flooding Grant Program (voluntary)
 - 100% funded with additional financial incentives pilot program (voluntary)

▪ The pilot program achieved only 20-30% success rate even in areas which have experienced basement flooding • May need to look into alternative policies in order for the disconnection program to be an effective solution for thousands of homes ○ Implementing mandatory by-laws will require political will. • Is there anyone pressing the government? ○ Only if basement flooding catches their attention ▪ Ex: 2000s with three large rainfall events (became a high-profile situation). The conclusion was to offset the large volumes of water • However, source control is a better option and should be prioritized
• How do you foresee involvement from the COTTFN in the PPCP update study? ○ Capture the importance of the Thames River from the COTTFN perspective. ▪ This will help in the development of the draft action plan as well as creating education components for the public ○ The Nation's priority is preserving the safety and quality of Deshkan Ziibi for drinking, hygiene, and ceremonial & spiritual purposes. ▪ The drinking water comes from groundwater in close proximity to the Thames River; one of the GUDI intakes is 50m from the river
• Committee Structure ○ Currently restructure, have sent out mandate letters to the councilors ○ The committee that would oversee the PCPP update study would be under governance and structure (with 4 councilors)
• Overview of improvements (from the last 5 years) that were implemented from the 2018 PPCP recommendations; what improvement are still outstanding ○ Great gains on combined sewer separation in the downtown core ▪ Have worked in coordination with the Rapid Transit projects: where road changes had to be completed, combined sewers were removed ○ Targeted weeping tile disconnection program was implemented to remove the clean ground water from the sanitary sewer. This reduces the potential to overload the sanitary sewer during wet weather causing overflow/bypass of untreated sanitary sewage directly to the receiving water body, or to the storm sewer and then to the receiving water body (i.e. Thames River). ▪ COVID-19 has slowed the disconnection program progress as it requires crews to be inside the homes

- Water monitoring is a large interest for the COTTFN
 - Ex: Kingston, Hamilton have interactive map
 - How can the City improve overflow notifications?
 - Educational piece: information should be readily available to the public (in real time?) showing public notification of any overflow event
 - Notifications are instant from the treatment operator, however, sometimes takes days (for analysis of sample) before COTTFN gets communication of overflow severity
- COTTFN have received funding through LTVCA for an agricultural monitoring program
- The PPCP has not done any monitoring of the downstream Thames River
 - Previous PPCP used biomap protocol (from the 1980s, not peer reviewed) which is dependent on temperatures
 - COTTFN believe it is useful to conduct benthic monitoring as well (have evidence of levels to influence political will)
- Further research to be done: how long does it take for overflow to reach COTTFN?
 - Working Group comprised of Middlesex London Health, City of London, Upper Thames and Lower Thames Valley Conservation Authorities to create an informed communication process
 - Conservation Authorities currently measure speed of the river

Meeting Action Items	
GMBP to upload presentation slides and project information sheet into Nations Connect for COTTFN to access.	Ashley
City to look into re-establishing working group to create informed communication process.	Mary
City to inquire internally how the Wastewater Treatment Operations group reports overflows at the Greenway Pollution Control Plant.	Yanzhen

City of London Pollution Prevention Control Plan (PPCP) Update Study

Chippewas of the Thames First Nation

Thursday October 26th, 2023

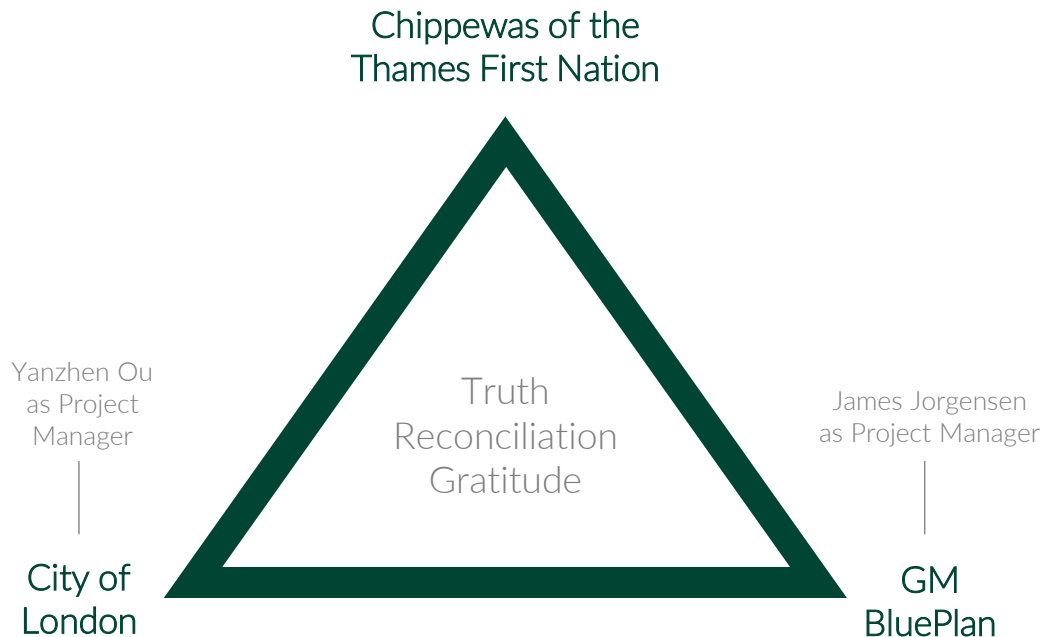

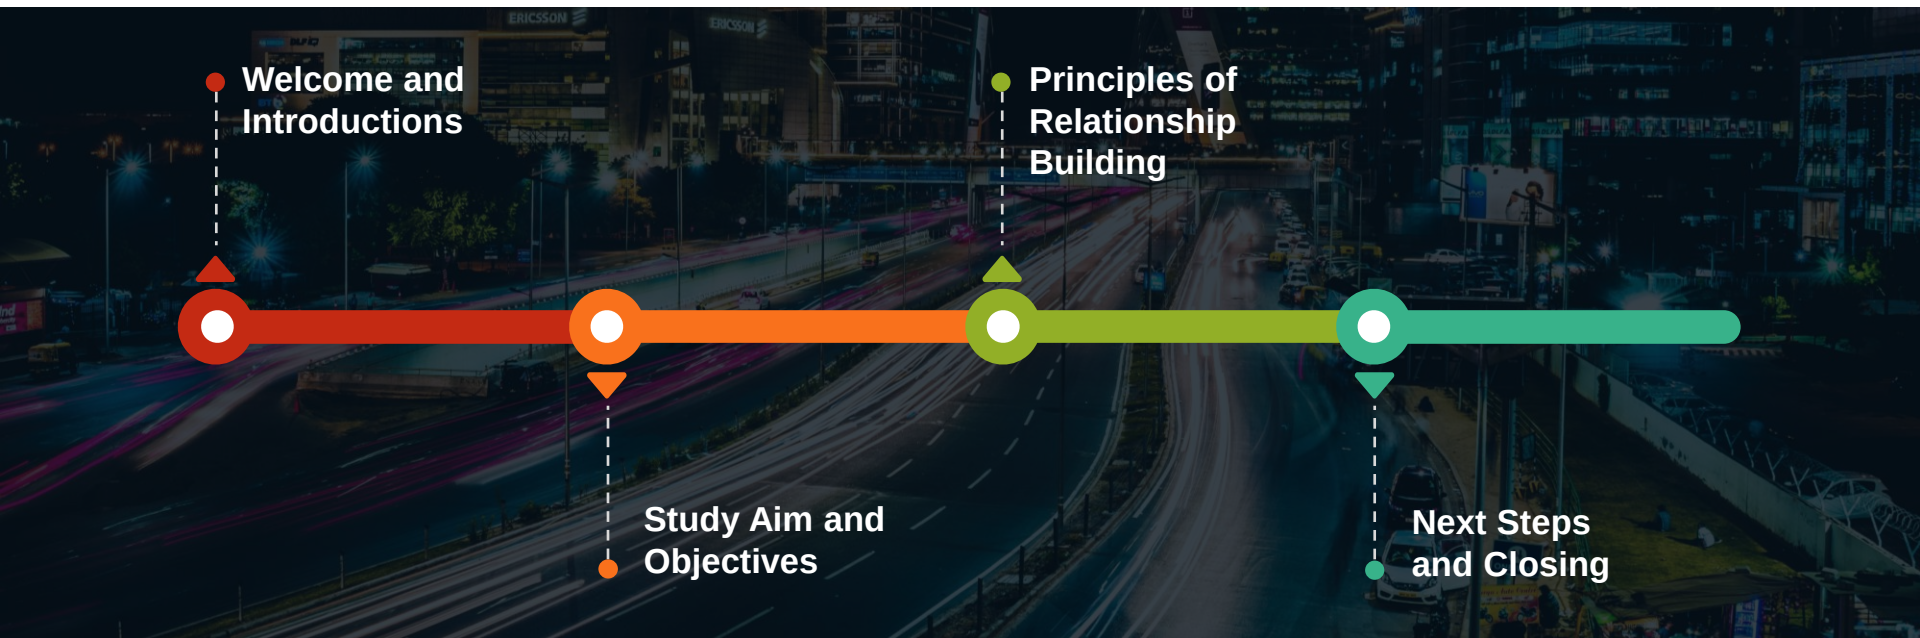

Introductions

Introductions

Information Content

Study Aims and Objectives

Aims and Objectives

AIM:

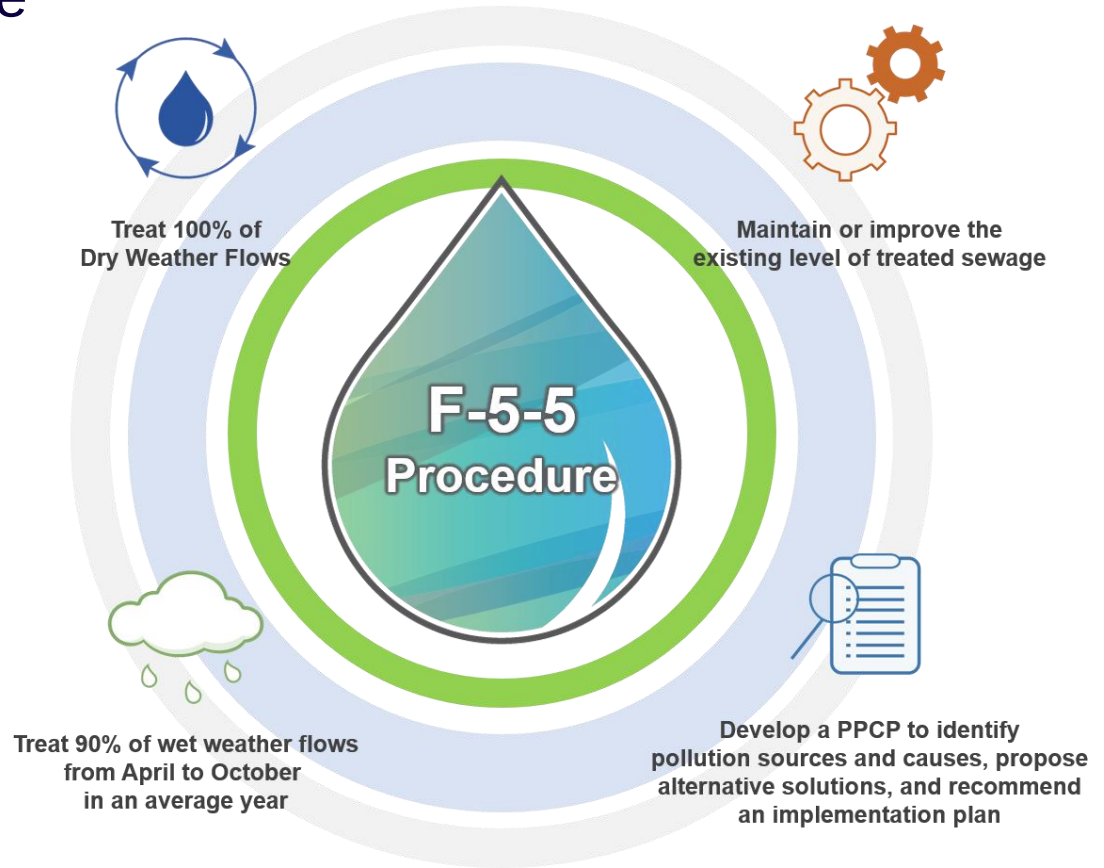

Develop a long-term management strategy to limit the volume and frequency of untreated wastewater discharges into the Thames River and receiving streams.

OBJECTIVES:

- Review the 2018 PPCP Implementation Plan to identify areas of improvement and address future needs,
- Incorporate a cost-benefit analysis to support prioritization of pollution source reduction options,
- Evaluate projects and programs to maximize benefits, feasibility, and participation of the public, and
- Engage the public and First Nations communities in the development of the updated action plan.

MECP F-5-5 Procedure

MECP F-5-5 Procedure defines the rules for treating municipal and private combined and partially separated sewers. When it rains, sanitary/combined sewer capacity can be used up from stormwater and cause the sewer system to be overwhelmed. Sewer system overflows then release the untreated sewage to the environment.

PPCP (2018)

Phase 1 (CH2M, 2014)

149 sewer system overflows (SSOs) were confirmed in the City which corresponds to 51 discharge points to the receiving watercourses.

Phase 2 (CH2M, 2017)

Priority SSOs and PS bypasses were identified based on:

- The reach of the watercourse being identified as “impaired” for water quality characterization
- Overflow volume at the location being greater than 1,000 m³ for the typical year.

Phase 3 (CH2M, 2018)

Development of an implementation plan for the recommended projects to mitigate or eliminate the prioritized groups of sewer system overflows (6) and pumping stations bypasses (6).

PPCP Update Study

Priority SSO locations identified for
weeping tile disconnection program

Medway River Pumping Station

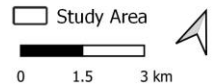

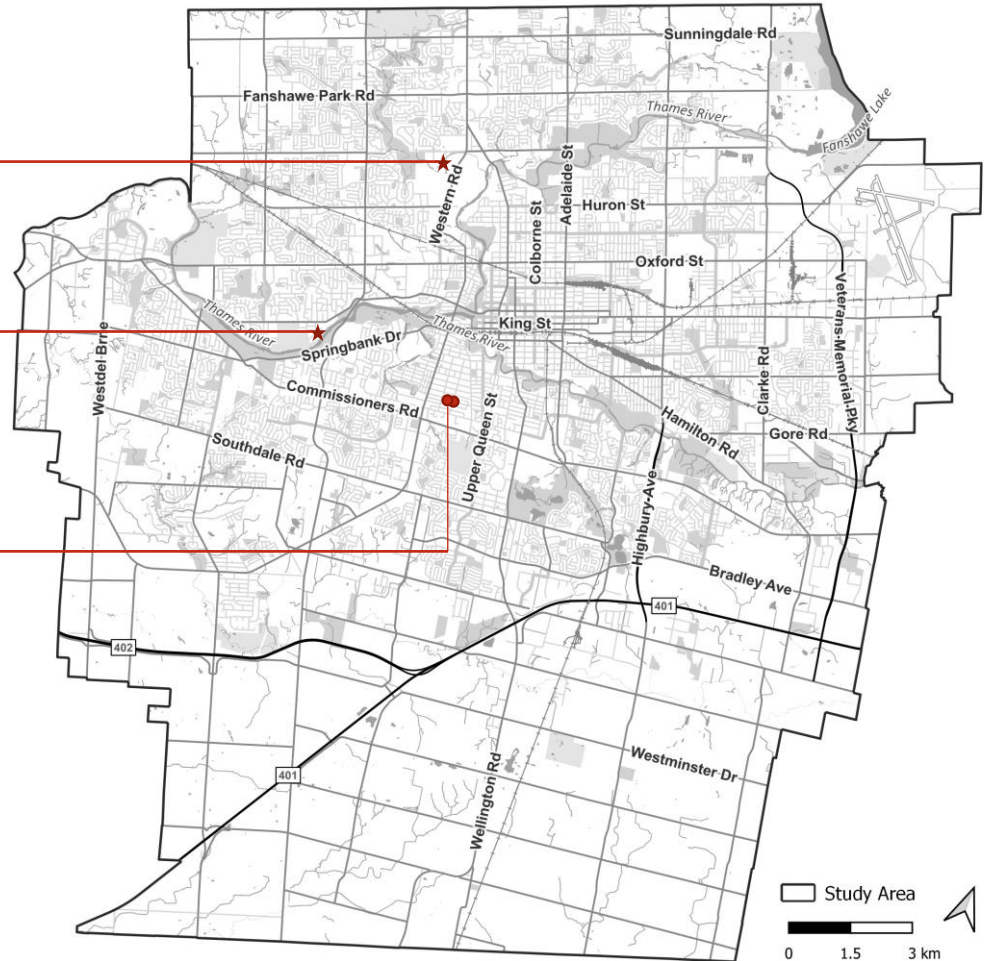

- Group H catchment area
- Typical Year Overflow
Volume: 1198 m3

Sunninghill Pumping Station

- Group I catchment area
- Typical Year Overflow
Volume: 863 m3

Cathcart/ Devonshire

- Group B catchment area
- Typical Year Overflow
Volume: 151 m3

Importance of the Thames River

- The Upper Thames River watershed is within the traditional territory of the Attawandaron, Anishinaabeg, Haudenosaunee, and Lunaapeewak peoples.
- Chippewas of the Thames First Nation, Oneida Nation of the Thames, Munsee Delaware Nation and Delaware Nation at Moraviantown continue to maintain a strong Indigenous presence along the river.

The Project Team recognizes the Nation's commitment to protect the watershed as part of their consultation territory and requests the respectful use of their traditional lands and waters.

How does Chippewas of the Thames First Nation wish to be involved in the PPCP study?

Questions to begin the Conversation

- How can the Project Team facilitate COTTFN's involvement in the PPCP Update Study?
- Is there sufficient information provided by the Project Team to make your concerns known?
- What additional information can be provided by the COTTFN in order for the Project Team to understand your concerns?
- Locate specific areas of concern within Study Area?

You do not need to provide answers to these questions now. Please take your time, if required, to formulate a written response later or discuss these items at a future meeting.

THE LONGWOODS TREATY WAS NEGOTIATED OVER SEVERAL YEARS, 1818 TO 1822, WHERE THE SOLE SIGNATORIES WERE CHIPPEWAS OF THE THAMES LEADERSHIP. MOST TREATIES IN CANADA REPRESENT A LARGE NUMBER OF FIRST NATIONS. THE LONGWOODS TREATY IS OUR TREATY AND OURS ALONE.

THE LONGWOODS TREATY AREA ENCOMPASSES APPROXIMATELY 900 SQUARE MILES. IT IS ESTIMATED TO CONTAIN 580,000 ACRES AND IS ROUGHLY SHAPED LIKE A RECTANGLE THAT BULGES IN THE MIDDLE. EITHER END OF THE TREATY AREA IS APPROXIMATELY 12 TO 14 MILES IN HEIGHT

WWW.COTTFN.COM/CHIEF-COUNCIL/OUR-HISTORY

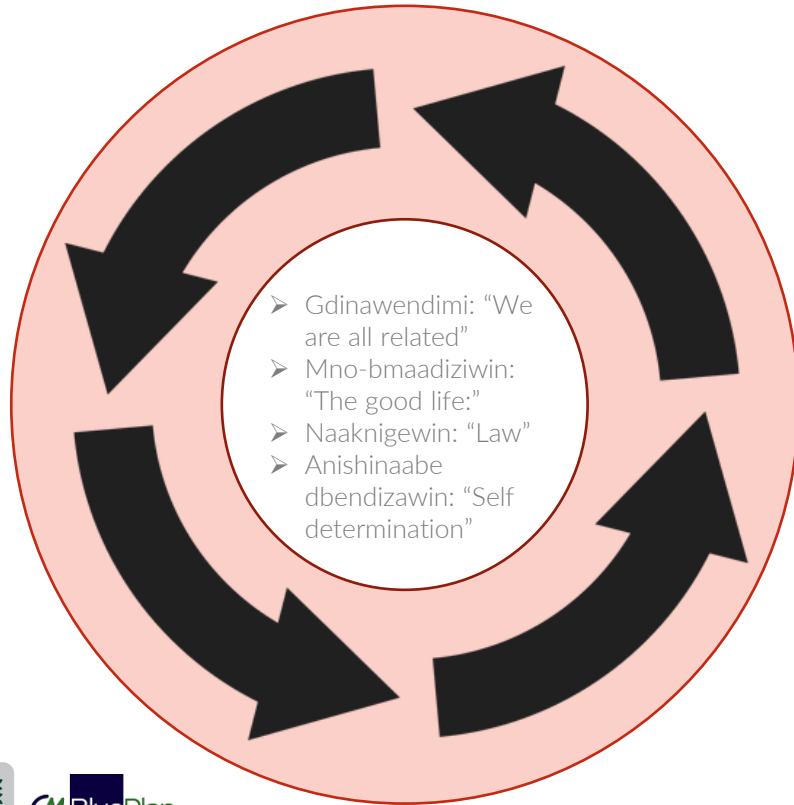

COTTFN is also signatory to the following treaties:

- London Township, 1796
- Sombra, 1796
- Treaty #29, 1827
- and McKee 1790

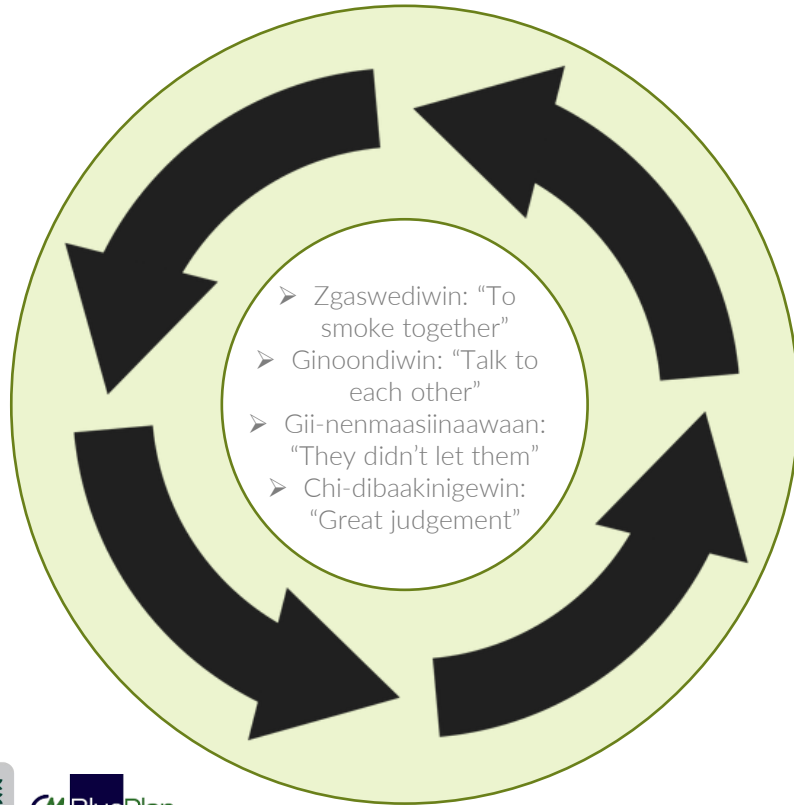

Principles of Relationship Building

Principles of Governance

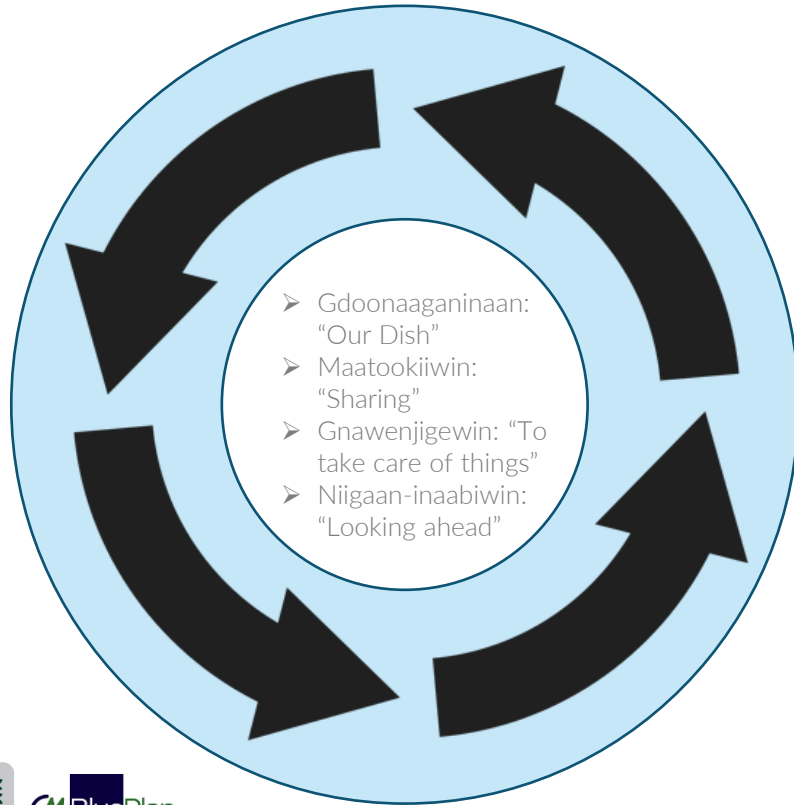

- How will the PPCP foster relatedness with everything that shares the world with us?
- How will the PPCP enhance the good life for all to encourage flourishing of life?
- The Project Team will embody First Nation's laws, acknowledging Creation and the Creator.
- The Project Team will respect the Two Row Wampum, acknowledging the alliance and wellbeing between equals.

Principles of Communication

- The Project Team desires to conduct communication that is grounded in truth, reconciliation, and gratitude.
- The Project Team desires to reach decisions in common, after full and satisfying discussion addressing the concerns of all involved.
- The Project Team recognizes the pre-Confederation Treaties and will adhere to the true intent of treaties and agreements through rights-based consultation.

Principles of Co-Existence and Harmony

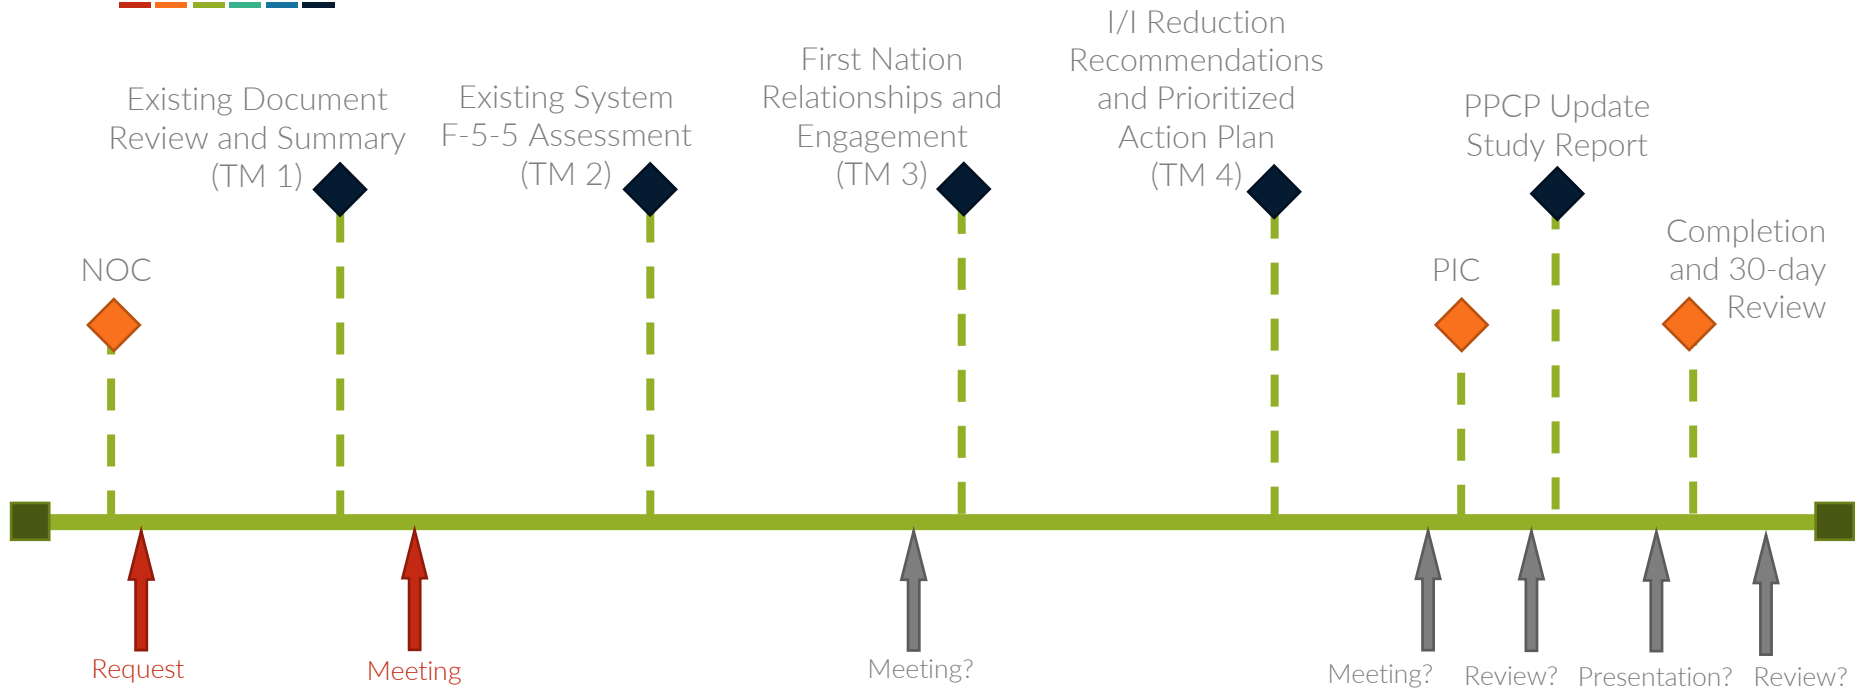

- How will the PPCP promote mutual safety and wellbeing (being able to hunt and harvest within ancestral lands)?
- How will the Nation share in the benefits related to the success of the PPCP?
- How will the PPCP incorporate conservation practices and Indigenous Knowledge (if desired) of the Nation?
- What might be the long-term implications of the PPCP (potential to affect lands, waters, air, health and wellbeing)?

Next Steps and Closing

Project Schedule

- Where in the project schedule would COTTFN like to be involved?
- How would COTTFN like to participate?

Further Discussion Questions

- What educational materials would you like to see created for COTTEN in relation to the PPCP and ongoing and likely actions and programs. E.g. a weeping tile disconnection program?
- Do you anticipate to require Nation initiated research on the cumulative effects of the project?
- Is the PPCP considered a minimal, moderate, or extensive impact project?
 - Requirement of a consultation framework, including a workplan, schedules and associated budgets?

You do not need to provide answers to these questions now. Please take your time, if required, to formulate a written response later or discuss these items at a future meeting.

Discussion Questions/Thoughts

- Additional agreements?
 - Note: Technical Studies (Natural Heritage, Cultural Heritage, and Archaeological Assessment) will not be completed by specialists and Field Investigations are not anticipated as part of the scope of this project.
- How can the Project Team build relationships with COTTfN and genuinely support and accommodate your involvement?

Thank You

THE CITY OF LONDON

POLLUTION PREVENTION CONTROL PLAN (PPCP) UPDATE STUDY

August 24, 2023

14760 School House Line
R.R. #3
Thamesville, ON
N0P 2K0
Canada

Koolamalsi Chief Stonefish,

The City of London is undertaking a study to update the Pollution Prevention Control Plan (PPCP) to proactively manage the City's wastewater system and its impact on the environment. The objective of the PPCP is to develop and implement a long-term solution to limit the volume and frequency of untreated wastewater discharges into the Thames River and receiving streams from sewer system overflows and pumping station bypasses.

The City of London regards Delaware Nation at Moraviantown as a valued partner with cultural and community interests in the quality and safety of the water of the Thames River. We welcome your involvement in this study to help us understand and identify any issues or concerns the community has with the current and future wastewater systems, and this input will be integrated within the PPCP. As part of the study process, we would also like to seek out your recommendations and prioritization of pollution source reduction programs based on the impacts on the community's wellbeing.

We look forward to working with the Delaware Nation at Moraviantown as a community partner by providing more information about the project and to engage you to include your feedback and participation as part of this project.

Please find attached the formal Notice of Commencement for the PPCP Update Study.

Good afternoon Chief Stonefish,

The City of London is undertaking a Class Environmental Assessment (EA) for the Pollution Prevention Control Plan (PPCP) Update Study.

The City of London regards Delaware Nation at Moraviantown as a valued partner in this project with cultural and community interests in the quality and safety of the water of the Thames River. We welcome your involvement in this study and would like an opportunity to schedule a meeting to discuss how we can support your participation, should you wish to be involved.

Attached is the Notice of Study Commencement as well as a Letter of Notification. Please circulate this email and the Notices to anyone within your organization who may be interested.

Additional information can also be found on the City's Project Website: <https://london.ca/projects/pollution-prevention-control-plan-update-study>. Should you have any questions regarding the Study, please contact the City's Project Manager, Yanzhen Ou (oyanzhen@london.ca) and include the secondary contact James Jorgensen (James.Jorgensen@gmblueplan.ca) in all emails.

Sincerely,

Ashley An, B.A.Sc.

Hello Cheyenne,

Thank you for speaking with me on the phone today. I wanted to follow up with you on a Notice of Study Commencement that was sent on August 24, 2023 regarding the Pollution Prevention Control Plan (PPCP) Update Study.

The City of London regards Delaware Nation at Moraviantown as a valued partner in this project with cultural and community interests in the quality and safety of the water of the Thames River. We welcome your involvement in this study and would like an opportunity to schedule a meeting to discuss how we can support your participation, should you wish to be involved. Attached is the original Notice of Study Commencement as well as a Project Information Sheet. Please circulate this email and attachments to anyone else within the Delaware Nation Lands and Resource Office who may be interested.

Additional information can also be found on the City's Project Website:
<https://london.ca/projects/pollution-prevention-control-plan-update-study>. Should you have any questions regarding the Study, please contact the City's Project Manager, Yanzhen Ou (oyanzhen@london.ca) and include the secondary contact James Jorgensen (James.Jorgensen@gmblueplan.ca) in all emails.

Sincerely,

Ashley An, B.A.Sc.
